YOUR TURN

- A turn is a **Move** (about 10 m) and an **Action**, in either order.
- Actions: **Attack**, **cast a Spell**, or **Aid** an ally.
- No initiative. All players act first, then the enemies.
- In touch range of a foe? You can only move away if you still have Guard, or an ally helps cover you.

MAKING AN ATTACK

Take the dice listed on your weapons, shield, and bonuses. Then, in order:

1. Everyone attacking the same target **rolls at the same time**.
2. The target (or a nearby ally) may **Deny**.
3. Attackers may spend dice on **Gambits**.
4. Take the **highest** die left.
5. Add **Bolster** damage from allies.
6. Subtract the target's **Armor**.
7. The result is the **Damage**.

Attack Modifiers

- **Impaired:** roll a single d4 only; no bonus dice, no Feats.
- **Enhanced:** gain a bonus die (a d8 unless stated).
- **Blast:** hits everyone in the area; roll against each separately.

Example. A mace (d8), a shield (d4), and an ally with two daggers (d6 each) roll 7, 3, 1, 5. Highest is 7. The 5 is spent to Bolster: Damage 8. Target Armor 2 leaves **6 Damage**.

GAMBITS

Discard any Attack dice showing **4 or higher**. Each die buys one effect. The foe must be a target of your Attack. Except Bolster and Move, the target gets a **Vigor Save** to ignore it.

- **Bolster:** +1 total Damage.
- **Move** after the Attack, even if you already moved.
- **Repel** a foe away from you.
- **Stop** a foe from moving next turn.
- **Impair** a foe's weapon or spellcasting next turn.
- **Trap** a shield, or **silence** a caster, until your next turn.
- **Dismount** a foe or disable a vehicle until your next turn.
- Another effect of similar impact.

Strong Gambit

If a die of **8 or higher** is used in *any* Attack (melee, ranged, or spell), choose one: **no Save** for the target, or a **greater effect** (disarm, break a wooden shield or weapon, remove a helm). A greater effect does not raise Bolster.

DAMAGE

1. Damage comes off **Guard**. At least 1 Guard left: you **Evade**.
2. Exactly **0 Guard** left: you gain a **Scar**.
3. Excess past Guard comes off **Vigor**: you are **Wounded**.
4. Lose **half or more** of your remaining Vigor: **Mortal Wound**. Down and dying; dead in an hour unless tended, but can be patched up in moments.
5. Vigor reaches 0: **Slain**.

FEATS

Special actions. Each Feat can be used once per Attack by each combatant. After use, make the Save or become **Fatigued** (no Feats until a Short Rest).

Feat	What it does	Save
Deny Universal	After an Attack roll vs. you or an ally within reach, discard one of its dice.	Grace
Focus Universal	After rolling an Attack, perform a Gambit without spending a die.	Spirit
Divine Smite Pentacles	Before a melee Attack without Blast: it gains +1d12.	Vigor
Cleave Swords	Before a melee Attack: it gains Blast.	Vigor
Masterstrike Swords	Before an Attack without Blast: it ignores Armor.	Vigor
Morph Wands	When you see a spell cast, modify it: ignore allies in Blast, add or remove Blast, change cost, change damage type, add or remove a target, or cast without sound or gesture.	Spirit
Humiliate Cups	When dealing Damage, choose which Virtue is damaged.	Spirit
Ruse Cups	Before an Attack, make two Attacks and pick one to use.	Grace

CONDITIONS

Fatigued	No Feats until you rest
Exhausted	Cannot Attack if you moved
Exposed	Guard set to 0
Impaired	Attacks roll a single d4
Vulnerable	Attacks against you are Enhanced
Deprived	Cannot benefit from resting
Dazed	Cannot perform Gambits
Bound	Cannot move
Shaken	Disadvantage on Spirit Checks and Saves

SCARS

- Gained when an Attack leaves you at **exactly 0 Guard** in real, deadly combat.
- Re-roll the die that caused it, **add your current Scar count**, and read the Scar table in the Rules.
- Effects clear at season's end or from a specialist. The **tally never resets**. Every 3 Scars grants 1 Experience.
- **Magical Scars** come from spell Attacks that leave you at 0 Guard, or from spells that say so. They use their own table.

INVENTORY

- **10 Item slots**. Fill the tenth and you are **Encumbered**: Guard set to 0.
- Worn gear takes no slot, except **Bulky** items, which take one.
- Wear up to four armor pieces: **Shield**, **Helm**, **Underlayer** (such as a Gambeson), **Outer Layer** (such as Plate).
- **Petty** items take no slot. Bombs, Flasks, Vials, and Syringes store three per slot. Remedies take a full slot each.

SPELLCASTING

- Casting is an **Action**. Morph (yours first, then others) is applied before the spell resolves.
- Then pay the **cost** from **Spirit** unless the spell says otherwise. Costs are 0, 2, 4, or 8.
- **Overflow:** cost beyond your Spirit comes out of **Vigor**. If Vigor was already the casting Virtue, you suffer a **Mortal Wound**.
- Spells take effect at once and rarely allow a Save, only when the target would be disabled, helpless, or wholly ineffective.
- You can hold **10 spells** in memory.

Ranges

Self · **Touch** (1 m) · **Short** (10 m) · **Long** (100 m) · **Extreme** (500 m)

Spell Qualities

- **Attack:** uses the Attacking rules with the spell's dice.
- **Direct damage:** lowers a Virtue as stated, ignoring Guard and Armor. Not an Attack.
- **Blast:** the die size is the baseline number of normal-sized creatures it can hold. A 2d8 Blast hits up to 8.
- **Curse:** lasts until the caster is killed or a specialist removes it. One instance per caster at a time.

FATIGUE & REST

- **Short Rest** (minutes): restores Guard, removes Fatigue.
- **Night's Rest** (safe place, food, lodging): restores Vigor to full.
- **Full Rest** (a week, safe): restores all Virtues.
- **Remedy:** an hour, serves up to four Fatekin, restores 6 points of its Virtue.

LUND

Quick Rules for New Fatekin

THE ONE RULE

Roll a **d20**. If it is **equal to or under** the Virtue being tested, you pass. Rolling low is good.

VIRTUES

Virtue	Stands for	At 0
Vigor	Strong body, sturdy bones, mighty heart	**Exhausted**: cannot Attack if you moved
Grace	Keen thought, swift reflex, flawless motion	**Impaired**: Attacks roll a single d4
Spirit	Composed mind, striking presence, guarded soul	**Exposed**: Guard set to 0

Virtues range 0 to 19. Each is rolled 1d6 + 1d12.

Virtue Loss

Loss that is not Damage (spell costs, Scars, Fatigue effects). It can **never** Mortally Wound or Slay.

GUARD & ARMOR

- **Guard** is a pool (rolled 1d6). Damage comes off Guard before any Virtue. While you have at least 1 Guard, you **Evade** the hit.
- **Armor** reduces Damage *before* it reaches Guard.
- Without Guard, you cannot walk away from a foe in touch range unless an ally assists your retreat.

SAVES & CHECKS

- **Save** (resist something) or **Check** (attempt something): roll d20, equal to or under the Virtue passes. Failure means a consequence, not always a failed action.
- **Opposed Check:** the lower roll wins, but only if it is at or under the Virtue. Whoever has the most to lose wins ties.
- **Advantage:** roll 2d20, keep the **lower**. **Disadvantage:** roll 2d20, keep the **higher**.
